Update on Newborn Screening

Comments

I am very pleased to be a part of the process to improve the health of Kansas' children as exemplified by our work on NBS. The committee's ability to absorb a great deal of information, work quickly, and reach consensus is a sign to me that we truly have children's health as our priority. Some of the topics we have already discussed (e.g. immunizations) will need to be re-evaluated time and time again. My only concern is that as previous topics increase in number, it may hamper our ability to go in depth back into these topics or to tackle new subjects.

I'd be interested in any of the topics.

No, but keep up the good work!
