

K A N S A S

RODERICK L. BREMBY, SECRETARY

KATHLEEN SEBELIUS, GOVERNOR

DEPARTMENT OF HEALTH AND ENVIRONMENT

April 23, 2006

Dear Child Health Advisory Committee Member:

Thank you for your participation on the Governor's Child Health Advisory Committee. As you are aware, the mandate of the group is to advise the Governor and KDHE on issues involving children, including obesity, newborn screening, immunizations, and health education. KDHE has been asked to organize, convene, and establish a work plan for the group. The basis for the current work plan is the belief that the CHAC will function as a citizen-based advisory body, reviewing KDHE and other state agency programming in the areas of concern, and approving or advising changes in new efforts within the focus areas.

We will convene the members of the group from 1-4 p.m. on Friday, May 19 in the Crumbine Room, Suite 540, of the Curtis State Office Building at which time we will prioritize our initial activities in line with the Governor's charge to the group. Subsequent to the discussion of the focus areas, the group may suggest additional topics for review and recommendation, and any need for additional meetings that may be required.

Please RSVP by phone or email to Connie Satzler, Envisage Consulting, 785-587-0151 or csatzler@kansas.net.

Sincerely,

Dennis Cooley, MD
Chairman
